

ARIZONA MINING INC.

Management's Discussion and Analysis

For the Three and Six Months Ended June 30, 2016

Introduction

This management's discussion and analysis ("MD&A") of Arizona Mining Inc. (the "*Company*", "*Arizona Mining*", "*we*", "*us*", or "*our*") covers the three and six months ended June 30, 2016. This MD&A takes into account information available up to and including August 8, 2016. This MD&A should be read in conjunction with the accompanying condensed consolidated interim financial statements and notes ("financial statements") for the three and six months ended June 30, 2016, and MD&A for the year ended December 31, 2015, which are available on the Company's website at www.arizonamining.com and on the SEDAR website at www.sedar.com.

The Company has prepared the condensed consolidated interim financial statements in accordance with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB") applicable to the preparation of interim financial statements, including IAS 34, Interim Financial Reporting.

All dollar amounts reported herein are in US dollars unless indicated otherwise.

Cautionary Note Regarding Forward-Looking Information

Certain information contained in this document constitutes forward-looking statements. All statements, other than statements of historical facts, are forward looking statements, including without limitation, statements with respect to the Company's expectations for drilling on the Taylor Deposit and the statements under "Summary and Outlook" later in this document. Forward-looking statements are often, but not always, identified by the use of words such as *may*, *will*, *seek*, *anticipate*, *believe*, *plan*, *estimate*, *budget*, *schedule*, *forecast*, *project*, *expect*, *intend*, or similar expressions.

The forward-looking statements are based on a number of assumptions which, while considered reasonable by the Company, are subject to risks and uncertainties. The Company cautions readers that forward-looking statements involve and are subject to known and unknown risks, uncertainties and other factors which may cause actual results, performance or achievements to differ materially from those expressed in or implied by such forward-looking statements and forward-looking statements are not guarantees of future results, performance or achievement. These risks, uncertainties and factors include general business, economic, competitive, political, regulatory and social uncertainties; actual results of exploration activities and economic evaluations; fluctuations in currency exchange rates; changes in project parameters; changes in costs, including labour, infrastructure, operating and production costs; future prices of silver and other minerals; variations of mineral grade or recovery rates; operating or technical difficulties in connection with exploration, development or mining activities, including the failure of plant, equipment or processes to operate as anticipated; delays in completion of exploration, development or construction activities; changes in government legislation and regulation; the ability to maintain and renew existing licenses and permits or obtain required licenses and permits in a timely manner; the ability to obtain financing on acceptable terms in a timely manner; contests over title to properties; employee relations and shortages of skilled personnel and contractors; the speculative nature of, and the risks involved in, the exploration, development and mining business; and the factors discussed in the section entitled "Risks and Uncertainties" in the MD&A for the year ended December 31, 2015.

Although the Company has attempted to identify important risks, uncertainties and other factors that could cause actual performance, achievements, actions, events, results or conditions to differ materially from those expressed in or implied by the forward-looking information, there may be other risks, uncertainties and other factors that cause performance, achievements, actions, events, results or conditions to differ from those anticipated, estimated or intended. Unless otherwise indicated, forward-looking statements contained herein are as of the date hereof and the Company disclaims any obligation to update any forward-looking statements, whether as a result of new information, future events or results or otherwise, except as required by applicable law.

About Reserves and Resources

This MD&A uses the terms measured, indicated and inferred resources as a relative measure of the level of confidence in the resource estimate. Readers are cautioned that: (a) mineral resources are not economic mineral

reserves; (b) the economic viability of resources that are not mineral reserves has not been demonstrated; and (c) it should not be assumed that further work on the stated resources will lead to mineral reserves that can be mined economically. In addition, inferred resources are considered too geologically speculative to have any economic considerations applied to them. It cannot be assumed that all or any part of an inferred mineral resource will ever be upgraded to a higher category. Under Canadian rules, estimates of inferred mineral resources may not form the basis of feasibility or pre-feasibility studies or economic studies except for preliminary economic assessments as defined under NI 43-101. Readers should also refer to the Company's Annual Information Form for the year ended December 31, 2015 and other continuous disclosure documents available at www.sedar.com, which is subject to the qualifications and notes set forth therein.

Description of Business

Arizona Mining Inc. is incorporated in British Columbia, Canada. The Company holds a 100% ownership interest in the Hermosa Project in Arizona, United States. The Company's corporate office is located at Suite 555 – 999 Canada Place, Vancouver, British Columbia, V6C 3E1 and its shares are listed on the Toronto Stock Exchange and trade under the symbol "AZ".

The Hermosa Project is a polymetallic mineral exploration project located approximately 100 kilometres southeast of Tucson, Arizona and about 15 kilometres north of the US – Mexico border. The Hermosa Project currently comprises two deposits, the Taylor Deposit and the Central Deposit. The Taylor Deposit, is a zinc-lead-silver carbonate replacement deposit and has a resource of 39.4 million tonnes in the Inferred Mineral Resource category grading 11% zinc equivalent ("ZnEq") utilizing a 6% ZnEq cutoff grade calculated in accordance with NI 43-101 guidelines. The Taylor Deposit remains open to the north, west and south over land controlled by the Company. Metallurgical test work on drill core from the Taylor Deposit projects overall recoveries of 92.9% Pb; 85.5% Zn and 91% Ag using industry standard froth flotation processing technology. The Central Deposit is a silver-manganese manto oxide development project that has a prefeasibility study announced in December 2013. The technical documents for both deposits are available on the Company's website at www.arizonamining.com or on Sedar at www.Sedar.com.

Summary and Outlook

During the second quarter of 2016, the Company continued to build on the significant progress achieved in advancing the Taylor Deposit. Major milestones achieved and reported during or subsequent to the quarter include:

- Closing the financing with Osisko Gold Royalties Ltd. by granting a 1% net smelter royalty on all sulfide ores of lead and zinc for C\$10 million and a private placement for C\$5 million.
- Closing the acquisition on May 4, 2016 of the 20% interest in the Hermosa Project that the Company did not own for consideration of 40 million common shares and 5 million common share purchase warrants of the Company. The Company now owns 100% of the project.
- Commencing an aggressive drill program on the Taylor Deposit designed to test the size and grade potential of the deposit. The results from 12 exploration drill holes and two water monitoring holes have been released to date, which confirm the extension of the resource onto the newly acquired patented claims to the northwest and the existing unpatented claims to the west.
- Closing a private placement of 14,000,000 common shares of the Company for aggregate gross proceeds of C\$18,060,000 (\$14,185,846).
- At June 30, 2016 the Company had \$16.2 million in cash and cash equivalents.

The Company currently has 10 drill rigs on site to determine the size potential of the deposit and for infill drilling. In addition to drilling, the Company is also performing additional metallurgical test work to optimize metal recoveries and determine the operational process flow sheet, continuing its environmental base line studies and working on the inputs for a resource update and a preliminary economic assessment.

Management's Discussion and Analysis
For the Three and Six Months Ended June 30, 2016
(U.S. dollars)

Taylor Deposit

Drill Program

Following receipt of funding from private placements and the sale of a royalty interest in the Hermosa Project in the second quarter of 2016 the Company is now engaged in an aggressive drill program to determine the extent of the Taylor Deposit sulfide mineralization and to expand and upgrade the existing inferred resource. To date the Company has released the results from 12 drill holes, which have targeted both the expansion of the resource onto the newly acquired patented claims to the north-west and onto the unpatented claims to the west. In addition to the exploration holes, two (2) water monitoring wells and a water production well have been completed to aid in the development of the project.

The results to date continue to indicate the tremendous size and grade potential of the Taylor Deposit. The deposit remains open to the north, west and south.

Selected intersections from the results released to date include:

(Drill intervals are down the hole drill width but are considered to be within 5% of true width)

Management's Discussion and Analysis
For the Three and Six Months Ended June 30, 2016
(U.S. dollars)

Resource

On February 1, 2016 the Company announced an updated mineral resource for its Taylor Deposit. The deposit now comprises a resource of 39.4 million tonnes in accordance with the NI 43-101 Inferred Mineral Resource category grading 11.04% zinc equivalent ("ZnEq") utilizing a 6% ZnEq cutoff grade. The resource at various zinc equivalent cut-off grades is estimated at:

Zn Eq% Cutoff	Zn Eq% Grade	Tonnes (Mt)	Pb%	Zn%	Cu%	Ag g/t
3	8.01	72.3	3.21	3.23	0.10	50.78
4	8.98	59.5	3.63	3.63	0.11	55.78
5	9.98	48.7	4.04	4.03	0.12	61.25
6	11.04	39.4	4.48	4.48	0.14	66.91
8	12.89	27.2	5.24	5.26	0.16	76.35
12	16.80	12.1	6.88	6.84	0.21	97.90
15	19.70	6.6	8.26	7.80	0.27	113.75
20	24.57	2.2	10.37	9.86	0.34	133.64

Results are based on a ZnEq grade calculated with the following metal prices: \$0.85/lb for lead and zinc; \$2.25/lb for copper; \$15/oz for silver. It is recognized for the Taylor Deposit that while Zn and Pb contribute approximately equally to the resource calculations, we have chosen to report Zn equivalents for calculation of the cut-off grade and the equivalents grade for the resource. Base Case highlighted.

The resource is based on assay results from 25 surface diamond drill holes completed through the end of 2015, totaling 19,648 meters (64,461 feet) of drilling, which have all intersected stratabound carbonate replacement sulfide mineralization within the Taylor Deposit. The updated Mineral Resource Estimate was prepared by Metal Mining Consultants Inc. of Highlands Ranch, Colorado.

Mineral resources are not mineral reserves and do not have demonstrated economic viability. There is no certainty that all or any part of mineral resources will be converted to mineral reserves. Inferred Mineral Resources are based on limited drilling (25 holes) which suggests the greatest uncertainty for a resource estimate and that geological continuity is only implied. Additional drilling will be required to verify geological and mineralization continuity and there is no certainty that all of the inferred resources will be converted to measured and indicated resources. Quantity and grades are estimates and are rounded to reflect the fact that the resource estimate is an approximation.

Financing and Corporate Activities

Royalty Financing and Private Placement

On April 25, 2016, the Company closed a financing for a total of C\$15.6 million, comprised of the sale of a net smelter royalty and certain private placements. Osisko Gold Royalties Ltd. ("Osisko") acquired a 1% net smelter royalty on all sulfide ores of lead and zinc (and any copper, silver or gold recovered from the concentrate from such ores) mined from the Hermosa Project for proceeds of C\$10.0 million (\$7,886,435). Osisko also subscribed for a total of 8.93 million units (each a "Unit") at a price of C\$0.56 per Unit, for gross proceeds of C\$5.00 million (\$3,943,218) and other parties subscribed for 1.06 million Units for a further C\$0.59 million (\$468,139). On April 28, 2016, the Company closed the balance of the private placement for a further 500,000 units at a price of C\$0.56 per unit for C\$280,000 (\$223,214) with a director of the Company. Each Unit consists of one common share and one half of one common share purchase warrant. Each whole common share purchase warrant entitles the holder to purchase one common share at a price of C\$0.75 per common share until between October 25, 2017 and October 28, 2017.

Private Placements

On April 28, 2016, the Company closed the balance of the March 2, 2016 private placement issuing 647,000 units to certain of the Company's directors and officers at a price of C\$0.42 per unit for gross proceeds of C\$271,740 (\$216,629). Each unit is comprised of one common share and one half of one common share purchase warrant. Each whole common share purchase warrant entitles the holder to purchase one common share at a price of C\$0.60 per common share until October 28, 2017.

On June 9, 2016, the Company closed a private placement of 14,000,000 common shares of the Company at a price of C\$1.29 per common share for aggregate gross proceeds of C\$18,060,000 (\$14,185,846). The offering was underwritten by a syndicate of underwriters led by Scotiabank and RBC Capital Markets, acting as joint bookrunners and co-lead underwriters, and including National Bank Financial Inc. and TD Securities Inc.

Acquisition of Minority Interest in the Hermosa Project

On May 4, 2016, following shareholder approval of the transaction at the Company's Annual General Meeting held on April 22, 2016, the Company closed the acquisition of 5348 Investments Ltd. ("5348 Investments"), thereby acquiring the 20% of the common shares and approximately 10% of the preference shares of AMI that it did not own. The acquisition was from a private British Columbia company controlled by Richard W. Warke, a Director of the Company and the Company's Executive Chairman. As a result of the acquisition of 5348 Investments by the Company, the Shareholders' Agreement governing the affairs of AMI was terminated effective May 4, 2016. The Company issued 40 million common shares and 5 million common share purchase warrants as consideration for the acquisition. Each common share purchase warrant is convertible into one common share of the Company at a price of C\$0.50 until May 4, 2019. The transaction has been measured at the fair value of the common shares and common share purchase warrants issued. Set out below is a summary of the acquisition:

<u>Consideration</u>		<u>Fair value</u>
40,000,000 common shares	\$	33,840,422
5,000,000 common share purchase warrants		2,900,346
Transaction and other costs		406,980
		37,147,748
Non-controlling interest on date of acquisition		6,289,558
Charged to deficit	\$	30,858,190

The transaction has been accounted for as an equity transaction whereby the fair value of the consideration in excess of the book value of the non-controlling interest on the date of acquisition has been charged to deficit.

Management's Discussion and Analysis
For the Three and Six Months Ended June 30, 2016
(U.S. dollars)

Management Appointment

On August 8, 2016 the Company appointed Susan Muir as Vice President Investor Relations and Corporate Communications. Susan is a seasoned investor relations executive, and was most recently Vice President, Investor Communications at Barrick Gold Corporation following a series of increasingly senior roles since 2007. Prior to Barrick, Susan also has 25 years of experience analyzing and covering large and small cap precious metals equities, respectively, for several major Canadian investment banks. Susan holds a Bachelor of Arts from Concordia University and will be based in Toronto.

Project Costs Capitalized

The following shows total costs deferred on the Company's Hermosa Project during the three and six months ended June 30, 2016 and 2015:

	Three months ended June 30,		Six months ended June 30,	
	2016	2015	2016	2015
Balance, start of period	\$ 79,578,203	\$ 71,178,210	\$ 73,558,572	\$ 70,371,838
Additions:				
Mineral property acquisition costs – above	-	-	4,277,480	-
Mineral property acquisition costs – other	167,424	22,695	360,294	45,838
Drilling	4,416,040	436,118	4,761,107	832,609
Property access, restoration and maintenance	673,360	108,930	842,209	189,488
Assay and analysis	355,123	101,076	362,295	139,970
Salaries, benefits and stock based compensation	574,526	205,485	884,322	362,013
Geologic consulting and support	273,028	51,721	285,636	105,793
Engineering and metallurgy	28,029	-	100,359	-
Environmental baseline studies & permitting	170,157	97,031	260,976	97,031
Other	618,742	54,791	800,355	111,477
	<u>7,276,429</u>	<u>1,077,847</u>	<u>12,935,033</u>	<u>1,884,219</u>
Sale of NSR	(7,886,435)	-	(7,886,435)	-
Foreign currency translation adjustment	(360,744)	-	283	-
	<u>(970,750)</u>	<u>1,077,847</u>	<u>5,048,881</u>	<u>1,884,219</u>
Balance, end of period	\$ 78,607,453	\$ 72,256,057	\$ 78,607,453	\$ 72,256,057

During the three and six months ended June 30, 2016 the Company capitalized expenditures of \$7,276,429 and \$12,935,033, respectively on its Hermosa Project compared to \$1,077,847 and \$1,884,219 in the corresponding periods of 2015. The costs for 2016 reflect the aggressive drilling and exploration program currently underway on the Taylor deposit that was re-initiated late in the first quarter of 2016 and intensified following receipt of funding during the second quarter of 2016. The costs for 2016 also include the acquisition in the first quarter of the 300 acres of patented lands adjacent to the Taylor Deposit at an allocated amount of \$4,277,480. Consideration for the acquisition comprised the assumption of the environmental liabilities relating to past activities on the site, which are estimated at \$5,277,480. As part of the acquisition the Company also received, in exchange for assuming the environmental liabilities, \$1,000,000 in restricted cash from the former owner of the property. The restricted cash is held in escrow for purposes of partially funding the required construction of a passive water treatment system. Mineral property acquisition costs also include the costs for staking new claims to the north of the Taylor Deposit.

The Company recommenced its drilling program on the Taylor Deposit in the first quarter of 2016 beginning with two drills on site. Following the receipt of funding previously discussed the number of drill was gradually increased to the current 10 core drills. Accordingly, all cost categories associated with the drilling have increased

Management's Discussion and Analysis
For the Three and Six Months Ended June 30, 2016
(U.S. dollars)

substantially over the 2015 comparable amounts and the first quarter of 2016. Salaries and benefits costs increased for the three and six months ended June 30, 2016 compared to the prior year due to the addition of new employees and certain salary adjustments. Engineering and metallurgy costs incurred in the first quarter of 2016 relate to the inferred resource released by the Company in February, 2016 and the related NI 43-101 Technical Report. The foreign currency translation adjustment of \$360,744 relates to the reversal of the foreign currency translation adjustment booked in the first quarter with respect to the acquisition of the patented mining claims following their transfer from the Canadian parent.

Management's Discussion and Analysis
For the Three and Six Months Ended June 30, 2016
(U.S. dollars)

For the three and six months ended June 30, 2016, the Company reported a net loss of \$1,067,644 (\$0.005 per common share) and \$1,908,497 (\$0.005 per common share), respectively compared to a net loss of \$428,613 (\$0.003 per common share) and \$730,303 (\$0.005 per common share) for the same periods in 2015.

Salary and benefits costs increased in both periods of 2016 compared to 2015 reflecting the appointment of a new President and CEO effective January 1, 2016 and certain salary adjustments.

The increase in stock based compensation expense, a non-cash cost, in both the three and six month periods is a result of the grant in late May, 2015 of 9,515,000 stock options with an exercise price of C\$0.40 per share to directors, officers and employees of the Company. The Company uses the Black-Scholes option pricing model to determine the value of stock options, which is then amortized as an expense over the vesting period.

Investor relations expense increased marginally in the second quarter and by \$89,716 to \$121,388 for the six months ended June 30, 2016 as a result of increased attendance at conferences and trade shows in the first quarter of 2016 to broaden market awareness of the Company and the Taylor Deposit.

The foreign exchange loss of \$250,939 in the three months and \$195,497 in the six months ended June 30, 2016 primarily reflects the impact of both the weakening of the Canadian dollar during the second quarter and the increased balances subject to exchange rate fluctuations, principally being cash. The increase in interest and finance charges in 2016 compared to 2015 reflects the increased borrowing from insiders to support the Company's operations.

Other comprehensive income represents the loss on the translation of the parent company's Canadian dollar financial statements into US dollars for presentation purposes of \$554,778 for the three months and \$618,132 for the six months ended June 30, 2016 and compares to a loss of \$39,196 and a gain of \$61,094 in the same periods of 2015.

Liquidity and Capital Resources

At June 30, 2016, the Company had cash and cash equivalents of \$16,183,442 compared to \$418,950 at December 31, 2015.

Cash outflow from operating activities was \$501,930 in the three months and \$955,820 in the six months ended June 30, 2016 compares to a use of cash of \$206,999 and \$437,667 in the same periods of 2015. The increased use of cash is primarily attributable to the same reasons for the increased corporate cash costs, as previously discussed.

Cash inflow from financing activities of \$22,783,653 for the three months and \$27,433,481 for the six months ended June 30, 2016 primarily relates to the closing of a number of private placements for \$19,037,046 less share issue costs of \$763,184 and proceeds of \$7,886,435 (C\$10,000,000) from the sale of a royalty interest in the Hermosa project (all as described under "Financing and Corporate Activities", earlier in this MD&A).

Cash inflow from financing activities for the three months ended June 30, 2016 also includes the repayment of C\$4.0 million (\$3,147,186) of loans from a company controlled by the Company's Executive Chairman together with accrued interest and fees of \$229,458. C\$2.0 million of the loans repaid had been advanced in 2015. The other C\$2.0 million repaid was received on January 13, 2016, as part of a C\$4.0 million loan in connection with the acquisition of certain patented mining claims. The lender waived its right to early repayment on the balance of the loan of \$2.0 million following the \$15.6 million financing that closed on April 25, 2016. The outstanding loan is to be secured by a GIC, and is repayable on the earlier of: one year from the date of advance; the date of any change of control of the Company; or the date the Company completes a financing of C\$10,000,000 or more by way of sale of securities from treasury or through the issuance of debt or other form of financing. The loan bears interest at 16% per annum, compounded monthly and is subject to a cash fee of 1% with an additional 1% fee that was paid after three months as the loan remained outstanding. In addition, with respect to the full \$4.0 million loan, 1,000,000 warrants have been issued to the lender. Each warrant entitles the lender to purchase one common share at a price of C\$0.30 per common share until January 13, 2021.

Management's Discussion and Analysis
For the Three and Six Months Ended June 30, 2016
(U.S. dollars)

Cash flow from financing activities for the six months ended June 30, 2016 also includes a private placement that closed in the first quarter of 2016 for 6,069,100 units at a price of C\$0.42 per unit for gross proceeds of C\$2,549,022 (US\$1,892,651). Each unit is comprised of one common share and one half of one common share purchase warrant. Each whole common share purchase warrant entitles the holder to purchase one common share at a price of C\$0.60 per common share until September 2, 2017.

Cash inflow from financing activities of \$896,872 in the three months and \$1,712,460 in the six months ended June 30, 2015 primarily relates to loans from insiders and contributions from the previous non-controlling interest.

Investing activities used cash of \$6,799,455 in the three months and \$10,285,527 in the six months ended June 30, 2016 compared to \$733,103 and \$1,283,204 in the same periods of 2015. The increase in both periods of 2016 compared to 2015 reflects the initiation of the Company's intensive drilling and exploration program following receipt of funding early in the second quarter of 2016. Included in investing activities for the six months ended June 30, 2016 is the \$2,310,833 contribution to the escrow and surety bond collateral requirements arising on the acquisition of the patented mining claims in the first quarter of 2016.

At June 30, 2016 the Company had cash flow commitments as follows (\$000's):

	< 1 Year	1-3 Years	3-5 Years	> 5 Years	Total
Accounts payable and accrued liabilities	\$ 1,855	\$ -	\$ -	\$ -	\$ 1,855
Due to related parties	1,582	-	-	-	1,582
Operating lease obligations	192	238	-	-	430
	<u>\$ 3,629</u>	<u>\$ 238</u>	<u>\$ -</u>	<u>\$ -</u>	<u>\$ 3,867</u>

As previously noted, at June 30, 2016 the Company had cash and cash equivalents of \$16,183,442. Based on anticipated cash flows, the Company is expected to have sufficient resources to meet its committed expenditures for the next twelve months. However, additional funds may be required to complete the level of expenditures planned on exploration activities on the Hermosa Project and the Company may need to seek additional funding to finance such activities. The Company has historically raised funds principally through the sale of securities, advances from Company insiders and most recently from the sale of a net smelter royalty. However, there can be no assurance that the Company will be able to obtain such additional funding or obtain it on acceptable terms.

Quarterly Review of Financial Information

The following table is a summary of the Company's results for the eight most recently completed quarters ended June 30, 2016:

Unaudited (\$000s, unless otherwise stated)	2016		2015				2014	
	Q2	Q1	Q4	Q3	Q2	Q1	Q4	Q3
Net loss	\$ (1,068)	\$ (841)	\$ (331)	\$ (444)	\$ (429)	\$ (302)	\$ (325)	\$ (402)
Exploration and evaluation assets additions	\$ (971)	\$ 5,659	\$ 854	\$ 448	\$ 1,078	\$ 806	\$ 584	\$ 1,275
US\$ to C\$ Exchange rate - period end	\$ 1.3009	\$ 1.2971	\$ 1.3840	\$ 1.3394	\$ 1.2474	\$ 1.2683	\$ 1.1601	\$ 1.1208
Basic and diluted net income (loss) per share	\$ -	\$ -	\$ -	\$ -	\$ -	\$ -	\$ -	\$ -

The most significant factors influencing the Company's quarterly results over the last eight quarters are:

- Receipt of \$7.9 million on the sale of a 1% NSR on the Hermosa property in the second quarter of 2016 that was applied for accounting purposes against the Exploration and Evaluation assets. Excluding this, the additions in the second quarter are \$7.3 million.

Management's Discussion and Analysis
For the Three and Six Months Ended June 30, 2016
(U.S. dollars)

- Impact of the weakening Canadian dollar in the second quarter of 2016, primarily on the Company's cash balances, which are largely denominated in Canadian dollars resulting in foreign exchange losses of \$250,939.
- Increased staffing levels and corporate activity in the first quarter of 2016 in response to the increased exploration on the Taylor Deposit.
- The acquisition of patented mining claims in the first quarter of 2016 at a net cost of \$4,277,480 together with legal and closing adjustments.
- The impact of the timing of stock option grants on stock based compensation expense including the higher expense where a portion of the grant vests immediately.
- Additions to exploration and evaluation assets from the third quarter of 2014 onwards reflect the drill program on the Taylor Deposit and ongoing property maintenance costs with the variation in expenditures by quarter dependent on the level of drilling and associated activity in the quarter and the other factors previously noted.
- The fourth quarter of 2015 includes a gain of \$183,205 with respect to the settlement of certain accounts payable for less than the amount owing.

Share Capital Information

As at August 8, 2016, the Company had an unlimited number of common shares authorized for issuance with 233,156,630 issued and outstanding and an unlimited number of preferred shares authorized with nil outstanding. Also at August 8, 2016, the Company had 11,204,000 stock options outstanding held by directors, officers, and employees and 33,013,401 warrants issued in connection with various private placements, the acquisition of 5348 Investments and insider loans.

Proposed Transactions

There are no undisclosed proposed transactions that will materially affect the performance of the Company.

Off-Balance Sheet Arrangements

The Company does not have any material off-balance sheet arrangements.

Related Party Transactions

In addition to the related party transactions or balances disclosed elsewhere in this MD&A, the Company had the following related party transactions during the three and six months ended June 30, 2016.

The Company shares office space, equipment, personnel and various administrative services with other companies (NewCastle Gold Ltd. and Armor Minerals Inc.) related by virtue of certain common directors and management. These services have been mainly provided through a management company equally owned by the related companies. Costs incurred by the management company are allocated between the related companies based on time incurred and use of services and are charged at cost.

The Company was charged for the following with respect to these arrangements:

	Three months ended June 30,		Six months ended June 30,	
	2016	2015	2016	2015
Salaries and benefits	\$ 194,473	\$ 110,331	\$ 429,667	\$ 253,192
Office and administrative	93,541	101,718	200,263	190,664
Other income	-	(21,962)	-	(29,215)
	<u>\$ 288,014</u>	<u>\$ 190,087</u>	<u>\$ 629,930</u>	<u>\$ 414,641</u>

In addition, for the three and six months ended June 30, 2016, the Company charged out \$4,529 and \$4,550, respectively, with respect to these arrangements (June 30, 2015 – \$4,589 and \$6,062). At June 30, 2016,

amounts receivable includes \$2,565 (December 31, 2015 – \$4,530) and prepaids and other includes \$21,887 (December 31, 2015 – \$25,962) with respect to these arrangements.

Other assets of \$231,803 (December 31, 2015 – \$217,885) relate to the Company's share of jointly owned assets (primarily security deposits, leasehold improvements, and furniture and equipment) held by the management company.

Critical Accounting Policies and Estimates

The Company's accounting policies are described in its consolidated financial statements for the year ended December 31, 2015. The preparation of the Company's consolidated financial statements requires management to make judgements, estimates and assumptions in the process of applying the Company's accounting policies that affect the reported amounts of assets, liabilities and contingent liabilities at the date of the consolidated financial statements and reported amounts of expenses during the reporting period. Estimates and assumptions are continually evaluated. However, actual outcomes could materially differ from these estimates. Revisions to accounting estimates are recognized in the period in which the estimates are revised and in future periods affected. Information about critical judgements and estimates in applying accounting policies that have the most significant effect on amounts recognized in the consolidated financial statements are as follows:

- Exploration and evaluation assets impairment estimation – The Company assesses its exploration and evaluation assets on a periodic basis to determine whether any indication of impairment exists. Where an indicator of impairment exists, an estimate is made of the recoverable amount, which is the higher of the fair market value less costs to sell and its value in use. In determining the value in use the Company will develop an estimated cash flow for the mineral property, which will be based on the Company's estimates of ore reserves and mineral resources. The Company estimates its ore reserves and mineral resources based on information compiled by qualified persons as defined in accordance with Canadian Securities Administrators' National Instrument 43-101 Standards of Disclosure for Mineral Projects requirements. The estimation of mineral reserves and resources is based upon the results, assumptions and interpretation of various exploration techniques and information and includes additional factors such as metallurgical assumptions, expected commodity prices, capital requirements and operating costs that will also be used to develop the cash flow model. The Company must also determine an appropriate discount rate at which to discount the cash flows to determine the net present value. Changes in any of these assumptions, interpretations and estimates may have a significant impact on the net present value and therefore may also impact the carrying value of the exploration and evaluation assets.
- Reclamation and restoration provision – As a result of the acquisition of certain patented mining claims the Company has assumed the environmental liabilities for past activities on the site. The Company has recorded a reclamation and remediation provision, which represents the estimated costs required to provide restoration and rehabilitation for those past activities. The provision requires the estimation of cash flows many years into the future as well as estimates of inflation and the selection of appropriate discount rates. A change in any of these inputs can have a significant impact on the provision.
- Stock based compensation – In determining the fair value of stock based compensation, the Company uses the Black-Scholes option pricing model. The Black-Scholes option pricing model requires the input of highly subjective assumptions such as the expected life of the options, estimates of interest rates and share price volatility that can materially affect the fair value estimate.

Changes in Accounting Policies

Certain new standards, interpretations and amendments to existing standards have been issued by the IASB or IFRIC. Some updates that are not applicable or are not consequential to the Company have been excluded.

IFRS 9, Financial Instruments: Classification and Measurement is the first part of a new standard on classification and measurement of financial assets that will replace IAS 39, Financial Instruments: Recognition and Measurement. IFRS 9 has two measurement categories: amortized cost and fair value. All equity instruments are

Management's Discussion and Analysis
For the Three and Six Months Ended June 30, 2016
(U.S. dollars)

measured at fair value. A debt instrument is measured at amortized cost only if the entity is holding it to collect contractual cash flows and the cash flows represent principal and interest. Otherwise it is measured at fair value through profit or loss. The standard was initially effective for annual periods beginning on or after January 1, 2013, but the complete version of IFRS 9, issued in July 2014, moved the mandatory effective date to January 1, 2018. The Company expects to adopt this standard effective January 1, 2018 and has not yet assessed the impact on its financial reporting.

On January 13, 2016, the IASB issued IFRS 16, Leases ("IFRS 16"), according to which, all leases will be on the balance sheet of lessees, except those that meet the limited exception criteria. The standard is effective for annual periods beginning on or after January 1, 2019. The Company and has not yet assessed the impact on its financial reporting of IFRS 16 on its financial statements.

Financial Instruments

The Company's financial instruments are classified into the following categories of financial assets and liabilities (shown at carrying value):

Category	Measurement	June 30, 2016	December 31, 2015
Cash and cash equivalents	Loans and receivables	\$ 16,183,442	\$ 418,950
Amounts receivable	Loans and receivables	\$ 35,613	\$ 172,951
Restricted cash	Loans and receivables	\$ 3,310,833	\$ -
Accounts payable and accrued liabilities	Other financial liabilities	\$ 1,854,673	\$ 211,630
Due to related party – current	Other financial liabilities	\$ 1,581,982	\$ 1,485,486

The carrying values of the Company's financial instruments in the table above approximate their fair values as a result of their short-term nature.

Financial risk management

The Company is exposed to various financial instrument risks and assesses the impact and likelihood of this exposure and attempts to manage the risk, where possible. These risks include market risk, liquidity risk and credit risk.

a) Market risk

Market risk represents the risk that the fair value of cash flows of a financial instrument will fluctuate because of changes in market prices. In particular:

Foreign exchange risk

Foreign exchange risk represents the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rate.

The Company incurs expenditures in Canadian and US dollars with the majority of the expenditures being incurred in US dollars exploring on its Hermosa property. As the functional currency of the parent company is Canadian dollars, foreign exchange risk arises because the amount of the US dollar cash and cash equivalents will vary in Canadian dollar terms due to changes in exchange rates. However, to the extent the US dollar balances will be used to fund future exploration expenditures on the Hermosa property the risk is mitigated and provides more certainty in terms of the funds available for that purpose.

At June 30, 2016, the Company is exposed to currency risk through the following US dollar denominated assets held by the Canadian parent company and Canadian dollar denominated assets and liabilities held by the US subsidiary company:

Management's Discussion and Analysis
For the Three and Six Months Ended June 30, 2016
(U.S. dollars)

	June 30, 2016	December 31, 2015
Cash and cash equivalents	US\$ 72,901	US\$ 397
Amounts receivable	903	664
Due from related party	-	139,089
Restricted cash	855,381	-
Accounts payable and accrued liabilities	(4,655)	(53,310)
	<u>US\$ 924,530</u>	<u>US\$ 86,840</u>
Cash and cash equivalents	C\$ 6,009,060	C\$ -
	<u>C\$ 6,009,060</u>	<u>C\$ -</u>

As at June 30, 2016, based on the above net exposures a 10% change in the Canadian-US dollar exchange rate would impact the Company's earnings by approximately \$328,000 (December 31, 2015 – \$9,000) and comprehensive income (loss) by \$1,098,000 (December 31, 2015 – \$104,000).

Price and Interest rate risk

Price risk is the risk that the fair value or future cash flows from a financial instrument will fluctuate because of changes in market prices other than those arising from interest rate and currency risk. The Company is not materially exposed to price risk at this time.

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Company is not materially exposed to interest rate risk at this time.

b) Liquidity risk

Liquidity risk represents the risk that the Company will be unable to meet its obligations associated with its financial liabilities. The Company endeavours to manage its liquidity risk by maintaining sufficient readily available cash in order to meet its liquidity requirements at any point in time (see discussion on liquidity earlier in this MD&A).

c) Credit risk

Credit risk represents the risk that one party to a financial instrument will cause a financial loss to the other party by failing to discharge an obligation. Credit risk arises for the Company from cash and cash equivalents held with banks and financial institutions, as well as credit exposure on outstanding amounts receivable and amounts due from a related party. The maximum exposure to credit risk is equal to the carrying value of the financial assets.

The Company manages its exposure to credit risk by holding its cash and cash equivalents through Canadian or US chartered banks, with short-term investments held in high-interest bank accounts and GIC's.

Risks and Uncertainties

An investment in the Company's common shares is highly speculative and subject to a number of risks and uncertainties. Only those persons who can bear the risk of the entire loss of their investment should invest in the Company's common shares. An investor should carefully consider the risks referred to below and the other information filed with the Canadian securities regulators before investing in the Company's common shares. Arizona Mining's business is subject to a number of risks and uncertainties including those described in the Company's Annual Information Form and Management's Discussion and Analysis for the year ended December 31, 2015, which are available on the Company's website at www.arizonamining.com and SEDAR at www.sedar.com. Any of the risks and uncertainties described in the above-noted documents could have a material adverse effect on the Company's business and financial condition and accordingly, should be carefully considered in evaluating the Company's business.

Disclosure Controls and Procedures and Internal Control over Financial Reporting

The Company's management, under the supervision of the Chief Executive Officer ("CEO") and Chief Financial Officer ("CFO"), have designed disclosure controls and procedures ("DC&P") and internal control over financial reporting ("ICFR"), as defined in National Instrument 52-109, *Certification of Disclosure in Issuers' Annual and Interim Filings*, based on the 2013 control framework developed by the Committee of Sponsoring Organizations of the Treadway Commission.

The DC&P have been designed to provide reasonable assurance that material information relating to the Company is made known to the CEO and CFO, particularly during the period in which the interim filings are prepared and the information required to be disclosed by the Company in its annual filings, interim filings or other reports filed or submitted by it under securities legislation is recorded, processed, summarized and reported within the time periods specified. The ICFR have been designed to provide reasonable assurance regarding the reliability of financial reporting for external purposes in accordance with international financial reporting standards. Due to the inherent limitations associated with any such controls and procedures, management recognizes that, no matter how well designed and operated, they may not prevent or detect misstatements on a timely basis.

Changes in Internal Control over Financial Reporting

NI 52-109 also requires Canadian public companies to disclose any changes in ICFR during the most recent fiscal quarter that has materially affected, or is reasonably likely to materially affect, ICFR. No material changes were made to internal controls in the three months ended June 30, 2016.

Assays and Quality Assurance/Quality Control

To ensure reliable sample results, the Company has a rigorous QA/QC program in place that monitors the chain-of-custody of samples and includes the insertion of blanks, duplicates, and certified reference standards in each batch of samples. Core is photographed and split in half with one-half retained in a secured facility for verification purposes.

Post March 2014, sample preparation (crushing and pulverizing) is performed at ALS Minerals Laboratories, an ISO/IEC accredited lab located in Tucson, Arizona. ALS Minerals Laboratories prepares a pulp of all samples and sends the pulps to their analytical laboratory in Vancouver, B.C. Canada for analysis. ALS analyzes the pulp sample by ICP following a 4-acid digestion (ME-ICP61 for 33 elements) including Cu (copper), Pb (lead), and Zn (zinc). All samples in which Cu (copper), Pb (lead), or Zn (zinc) are greater than 10,000 ppm are rerun using four acid digestion with an ICP – AES finish (Cu-OG62;Pb-OG62; and Zn-OG62) with the elements reported in percentage (%). Silver values are determined by ICP ((ME-ICP61) with all samples with silver values greater than 100 ppm repeated using four acid digestion with an ICP-AES finish (Ag-OG62) calibrated for higher levels of silver contained. Any values over 1,500 ppm Ag triggers a fire assay with gravimetric finish analysis. Gold values are determined by a 30 gm fire assay with an ICP-AES finish (Au-ICP21).

Pre-March 2014, sample preparation (crushing and pulverizing) was performed at Skyline Laboratories, an ISO/IEC accredited lab located in Tucson, Arizona. Skyline Laboratories prepared two pulps of all samples and completed analysis of one pulp sample by ICP for Cu% (copper), Pb% (lead), Zn% (zinc) and Mn% (manganese). The second pulp was shipped to Inspectorate Labs, an ISO: 9001-2008 accredited laboratory in Reno, Nevada, where the duplicate pulp was analyzed for Au (gold) and Ag (silver). Silver values were determined by gravimetric fire assay (1 AT) with gold values determined by an AA finish from the same dore bead: Final silver value is the weight of the dore bead minus the AA gold value. In certain drill holes Skyline completed analyses of pulps for gold (FA-1AT/AA) and silver was determined by multi-acid digestion/AA finish. If the silver value was greater than 150 gpt the sample was redone by gravimetric FA (1AT) with the gravimetric gold value subtracted. At both labs if the FA/AA Au value was greater than 3 gpt the Au assay was repeated by FA gravimetric methods. Certain duplicate pulps had gold-silver QA/QC checks run at Skyline by the above methods. Also certain duplicate pulps also had Cu, Pb, Zn, Mn QA/QC checks using ICP/AA methods and 30 element spectral ICP determined at Inspectorate after 4-acid digestion.

Qualified Persons

Scott Wilson, President of Metal Mining Consultants, is an independent qualified person as defined by National Instrument 43-101 and approved and verified the information in relation to the February 1, 2016, updated Taylor Deposit resource estimate. Mr. Wilson is a Certified Professional Geologist and member of the American Institute of Professional Geologists (CPG #10965) and a Registered Member (#4025107) of the Society of Mining, Metallurgy and Exploration, Inc., a professional association and designation recognized by the Canadian regulatory authorities.

The results of Arizona Mining's drilling results on the Taylor Deposit have been reviewed, verified and compiled by Donald Taylor, MSc., PG Chief Operating Officer for Arizona Mining, a qualified person as defined by National Instrument 43-101 (NI 43-101). Mr. Taylor has more than 25 years of mineral exploration and mining experience, and is a Registered Professional Geologist through the SME (registered member #4029597). Mr. Taylor is also a Licensed Professional Geologist in several US states.
