NEWS RELEASE

AZ MINING AGM RESULTS

Vancouver, B.C., June 30, 2015 – AZ Mining Inc. (TSX: AZ) (“AZ Mining” or the “Company”) reports the results from its 2015 annual general and special meeting of shareholders held on June 29, 2015. Shareholders voted in favour of all items put forward by the Board of Directors and management.

Each of the nominees listed in AZ Mining’s Management Information Circular dated May 27, 2015 was elected as a director. A summary of the results is as follows:

Name of Nominee	Votes For	%	Votes Withheld/Abstain	%
Poonum Puri	37,725,400	99.79	79,173	0.21
Donald R. Siemens	37,340,155	98.77	464,418	1.23
Donald R. Taylor	37,745,722	99.84	58,851	0.16
Robert P. Wares	37,371,370	98.85	433,203	1.15
Richard W. Warke	36,558,673	96.70	1,245,900	3.30

Shareholders also voted in favour of the appointment of PriceWaterhouseCoopers LLP, Chartered Accountants, as auditors of the Company for the ensuing year and authorized directors to fix their remuneration; certain amendments to the Company's stock option plan and all unallocated options thereunder; the cancellation of and grant of certain stock options; and the Company's advance notice policy.

About AZ Mining

AZ Mining is a Canadian mineral exploration company focused on the development of its 80% owned Hermosa property located in Santa Cruz County, Arizona. The Hermosa property currently has two distinct projects: Hermosa North West, a zinc-lead-silver carbonate replacement zone sulfide mineral exploration project; and Hermosa Central, a silver-manganese manto oxide development project. North West has a resource calculated in accordance with NI 43-101 and is currently being drilled to test the limits of that resource. The Company released the results of the first five holes of the current drill program on North West in May, 2015 that showed high grade zinc, lead and silver intercepts over significant thicknesses. Central's December 2013 prefeasibility study indicates it is expected to be one of the largest primary silver producers as well as the only electrolytic manganese metal producer in the USA at industry low cash costs. The pre-feasibility study estimates annual production of 5.7 million ounces of silver and 110 million pounds of electrolytic manganese metal (EMM) at average cash costs of \$4.41 per silver ounce and \$0.74 per EMM pound over an 18 year mine life.

Cautionary Note Regarding Forward-Looking Information

Certain information contained in this press release constitutes forward-looking statements. All statements, other than statements of historical facts, are forward looking statements including statements with respect to the Company's intentions for its Hermosa property in Arizona, USA including, without limitation, drilling, updating the resource and metallurgical testing on Hermosa NW and expected future mineral production and operating costs on Hermosa Central. Forward-looking statements are often, but not always, identified by the use of words such as may, will, seek, anticipate, believe, plan, estimate, budget, schedule, forecast, project, expect, intend, or similar expressions.

The forward-looking statements are based on a number of assumptions which, while considered reasonable by AZ Mining, are subject to risks and uncertainties. In addition to the assumptions herein, these assumptions include the assumptions described in AZ Mining's management's discussion and analysis for the year ended December 31, 2014 ("MD&A"). AZ Mining cautions readers that forward-looking statements involve and are subject to known and unknown risks, uncertainties and other factors which may cause actual results, performance or achievements to differ materially from those expressed in or implied by such forward-looking statements and forward-looking statements are not guarantees of future results, performance or achievement. These risks, uncertainties and factors include general business, economic, competitive, political, regulatory and social uncertainties; actual results of exploration activities and economic evaluations; fluctuations in currency exchange rates; changes in project parameters; changes in costs, including labour, infrastructure, operating and production costs; future prices of zinc, lead, silver and other minerals; variations of mineral grade or recovery rates; operating or technical difficulties in connection with exploration, development or mining activities, including the failure of plant, equipment or processes to operate as anticipated; delays in completion of exploration, development or construction activities; changes in government legislation and regulation; the ability to maintain and renew existing licenses and permits or obtain required licenses and permits in a timely manner; the ability to obtain financing on acceptable terms in a timely manner; contests over title to properties; employee relations and shortages of skilled personnel and contractors; the speculative nature of, and the risks involved in, the exploration, development and mining business; and the factors discussed in the section entitled "Risks and Uncertainties" in the MD&A.

Although AZ Mining has attempted to identify important risks, uncertainties and other factors that could cause actual performance, achievements, actions, events, results or conditions to differ materially from those expressed in or implied by the forward-looking information, there may be other risks, uncertainties and other factors that cause performance, achievements, actions, events, results or conditions to differ from those anticipated, estimated or intended. Unless otherwise indicated, forward-looking statements contained herein are as of the date hereof and AZ Mining disclaims any obligation to update any forward-looking statements, whether as a result of new information, future events or results or otherwise, except as required by applicable law.
